

## Value-Driven Medication Management Program

### 2025 Drug List

Our Value-Driven Medication Management Program focuses on optimizing drug therapy by prioritizing well-established, lower-cost medications that deliver equivalent or superior clinical outcomes compared to their more expensive counterparts. By excluding certain high-cost brand-name drugs when a therapeutically comparable generic is available, as well as newly introduced medications that offer no additional benefits over existing options, we ensure that your clients receive the most essential and impactful treatments while managing costs. Furthermore, our program identifies and excludes select high-price generics when a more affordable alternative within the same therapeutic class is available, maximizing cost-savings without compromising quality of care.

ABILIFY	DONNATAL	NIFEREX
AKLIEF	ECOZA	NITRO-BID
ALREX	EEMT	NUTRASEB
ALTOPREV	ENSTILAR	ORACEA
AMYTAL	EPANED	OSCIMIN
ANTARA	EZALLOR	PLEXION
